PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate passionate about Data Analytics and Full Stack Development. Skilled in Python, SQL, Power BI, Tableau, HTML, CSS, JavaScript, and frontend frameworks. Experienced in data collection, cleaning, visualization, and reporting, delivering actionable insights through projects and internships to improve processes, applications, and data-driven decision-making.

EDUCATION

Bonam Venkata Chalamayya Engineering College | ECE — Odalarevu , India
Bachelor of Technology ; GPA : 8.62 (Till now) — 2022 - 2026

SKILL SUMMARY

Programming & Scripting Languages: Python, C, HTML, CSS, JavaScript, C#, R
Databases: MySQL, MongoDB
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Flask, React.js, Node.js, Express.js, Tailwind CSS
IDEs: Visual Studio Code, Jupyter Notebook, Google Colab
Tools & Platforms: Power BI, Tableau, Excel, Alteryx

INTERNSHIPS

Edunet Foundation – Internship

- Gained hands-on experience in building machine learning models using Python and scikit-learn.
- Worked on real-world datasets to perform data preprocessing, visualization, and predictive modeling.
- Developed a mini-project demonstrating the complete AI/ML workflow from data analysis to model evaluation.

Edunet Foundation Internship :

- Built a responsive web application using HTML, CSS, JavaScript for global city exploration.
- Integrated OpenWeatherMap API and Unsplash API to provide real-time weather, attractions, and ravel images.
- Designed a mobile-friendly interface, applying frontend development and API integration to enhance user experience.

PROJECT

InternVault | Link

- Built a web app to centralize internship portals, including USA opportunities.
- Implemented a verification system to identify real vs. fake internships.
- Developed SkillVault with curated skills, courses, and projects for students.
- Enabled students to host internships from companies like Flipkart and Amazon.

Tourist Explorer | Link

- Built a responsive web app using HTML, CSS, JavaScript with OpenWeatherMap and Unsplash APIs.
- Implemented city search to deliver real-time weather, attractions, and events information.
- Enhanced user experience through API integration, frontend development, and mobile-friendly design.

Employee Salary Prediction | Link

- Developed a regression model using Python and scikit-learn to predict salaries based on experience, education, and role.
- Performed data preprocessing including handling missing values, encoding categorical variables, and applying feature scaling.
- Evaluated model performance using R^2 score, MAE, RMSE, and visualized results with Matplotlib and Seaborn.

Hackathons & Workshops

- Participated in 5+ hackathons focused on AI/ML, Web Development, Data Science, and Data Analytics.
- Gained hands-on experience in solving real-world problems through collaborative coding, data analysis, and innovative solutions.
- Enhanced technical expertise in Python, SQL, frontend frameworks, and machine learning libraries while working in competitive environments.
